Summary

As a budding Web Developer, I am an enthusiastic newcomer eager to make an impact in the world of web development. I possess foundational knowledge in HTML, CSS, JavaScript, TypeScript, React, and Node.js. I'm driven to design dynamic, responsive user interfaces and build robust back-end systems using Express.js and various databases.

Experience

MERN Developer, PMaxTek – Mumbai, Maharashtra, India July 2024 – December 2024

- Designed and developed web applications from scratch: Crafted custom applications using the MERN stack, resulting in increased client satisfaction.
- Implemented data management with MongoDB, optimizing the storage and retrieval of application data.
- Collaborated with cross-functional teams to drive channel growth through effective acquisition strategies.

Projects

Uber-Clone github.com/akshat875/uber-clone

- This Uber Clone is a comprehensive platform designed to serve both users and captains, offering functionality to book rides, manage profiles, and track activity seamlessly. The project includes a robust backend API built with the MERN stack, ensuring scalability and efficiency. The system implements authentication for both users and captains, along with features like vehicle registration, booking management, and secure data handling.
- Tools Used: React, Node.js, Express, Tailwind CSS, Remix (UI Icons), JWT(secure authentication)

Netflix-GPT netflix-ai-delta.vercel.app

- Created a well-structured and visually appealing application. Developed key features such as Header and routing, user authentication forms, and implemented the useRef Hook for efficient DOM handling.
- Configured Redux with userSlice and added Chat-GPT features, including a Search Bar and personalized recommendations.

MedAssist github.com/akshat875/MedAssist_Final

- Developed a healthcare application leveraging the MERN stack, Python, and Flask to streamline medical service efficiency.
- Built scalable backend architecture using Node.js, Express.js, and MongoDB for high-performance data handling. Employed Flask for Python-specific functions, enhancing data processing capabilities.

Education

Dr. A. P. J. Abdul Kalam Technical University, Bachelor of Technology 2020–2024

- **Branch:** Information Technology

Aditya Birla Intermediate College, Higher Secondary 2017–2018

Technologies

Programming Languages: C, Python, Java, HTML, CSS, SCSS, JavaScript, TypeScript

Libraries/Frameworks: ReactJs, Express, EJS, Mongoose, Material-UI, Node.js, Tailwind CSS

Tools / Platforms: Git, GitHub, DSA, Figma, MS Office, Postman, Docker, AWS Web Services

Databases: MongoDB, MYSQL
